**“We see things differently.
We see the ripples in the water.”**

David Webster, Chairman
The Seventy Ninth Group

As we continued our global expansion, we saw the opportunity that Gibraltar provided as a world-renowned, well-regulated financial hub.

Being a self-governing British overseas territory, Gibraltar has the autonomy to set its own taxes, pass its own laws and has complete control over its economic landscape.

This provides a political and economic stability that allows Gibraltar to prosper. As it complies with all the EU's financial services regulation, Gibraltar is white-listed by the Organisation for Economic Co-operation and Development (OECD) and all other international monetary and fiscal supervisory organisations. Despite having left the EU, Gibraltar is committed to complying with both European and UK regulatory standards.

Furthermore, Gibraltar maintains an almost unrivalled level of access to UK markets, commercial solutions and high net worth individuals. Both funds and asset managers therefore benefit from having a Gibraltar licence to market their products to UK businesses, investment houses and investors.

As such, it made perfect sense for us to domicile the Seventy Ninth Private Equity Fund in Gibraltar.

Investment Strategy

- Achieve capital growth by investing in, and retaining, UK property assets in multiple real estate markets such as residential, commercial, and leisure. It is managed in house by our award-winning team with significant acquisition, asset management & development experience;
- Reduce volatility of returns by managing the risks associated with investing in unlisted equities;
- The fund focuses on special opportunities in asset-rich and a mix of 'core' and a 'core-plus' strategy;
- Depending on market conditions, the fund's stance is opportunistic, providing rescue financing and or/ acquire distressed assets;
- The team implements asset management initiatives to drive returns both short and long term regardless of market direction;
- Capital structure agnostic approach to structuring; asset liquidation value is always primary investment focus;
- ESG (Environmental, Social & Governance) & sustainability are incorporated into asset management & investment decisions.

There is a set of criteria for the acquisition of any property asset acquired. One of the following requirements must be met:

1. There must be the opportunity to add value by way of redevelopment on the site(s) by extension or rebuilding. This may also include obtaining planning permission for the future development, and thereafter selling the property with equity uplift and the benefit of planning permission.
2. Potential for refurbishment of the property and resold with the solvent equity uplift maximising income.
3. Opportunity to develop or improve new or existing revenue streams, for example, improve leases currently in place or create new rental streams.

“We enable investors to gain exposure to the UK property market in a financially regulated environment.”

David Webster, Chairman
The Seventy Ninth Group

The management of the Fund utilises long standing relationships with banks, insolvency practitioners, estate agents, accountants and solicitors — who acknowledge the Seventy Ninth Private Equity Fund as a reliable exit route with an agile and deliverable acquisition model.

As the disruption of COVID-19 continues to affect economies, soaring inflation drives up the cost of living, and a war continues to rage in Ukraine, the Seventy Ninth Group and its board of Directors are witnessing significant waves of market distress across the UK property market - predominantly caused by government policy implemented to assist with market recovery - in which the Seventy Ninth Group has positioned itself to acquire assets at between 30%—40% of their value due to their distressed nature or circumstance.

About The Project

An ambitious new development located on the outskirts of Warrington, Millennium Park will see the conversion of a traditional commercial unit into a contemporary, fully-equipped working environment for 59 local businesses.

For many SMEs, working fully remotely is simply not a sustainable business model. Those working from home are often faced with a multitude of distractions, or require an environment they can dedicate solely to working and growing their business. However, this can be difficult to achieve for smaller businesses, as they are often priced out of larger office buildings, and units that are the right size are often dated and lacking in access to many essential amenities.

With Millennium Park, our goal is simple: we aim to provide businesses across the North West area with a state-of-the-art centralised business hub, tailored to the exact needs of growing companies, new business ventures and SMEs alike.

We are focused on not only ensuring that the office space is tailored to the requirements of any resident businesses, but also that the location itself works for as many firms as possible, with easy motorway access, fantastic transport links and a number of amenities right on your doorstep.
