Initial investment amount	

I hereby declare that my advisor: _____

- 1) Interviewed me extensively to determine my current financial situation and capacity and my risk profile as an investor.
- 2) Explained to me in detail the type of financial instrument recommended, having paid special attention to the structure of charges and any penalty that could be incurred for cancellation or early withdrawal.
- 3) The advisor showed me the Capital International Group (CIG) Tariff Sheet that shows all admin fees of the international investment platform. I have signed a copy of this tariff Sheet and agree with the corresponding fees.
- 4) The advisor gave me the product brochure and or Investment Memorandum of the financial institution recommended to me so I could read and save it for future reference.
- 5) CIG offers an open architecture investment proving investors to a multitude of asset classes. Some investments such as corporate bonds, loan notes and alternative investment funds are for professional/sophisticated investors only and a separate declaration may be required before investing. Historical performance of all investment funds is no guarantee for future performance. KNG is not responsible for the results of the individual investments.
- 6) The advisor explained that the unit value of certain investments available via CIG may have volatility and that therefore it may go up or down and hence once again the historical results are not a guarantee for future results.
- 7) The advisor explained to me the need to save up to 2% of the value of the investment in cash to cover future administrative and custodian costs of the investment.

For my part, I confirm that I am clear about the advice that has been given to me and that I am aware that:

My contract is directly with the financial institution, so I can cease use of the intermediary services at any time without having any negative impact on my investment. For the same reason, I am aware that when I make an investment with a financial institution, all of my monetary contributions have to go directly to the said financial institution. At no point do I make monetary transfers to the financial advisor since the advisor is not a custodian and cannot deposit the money in his account / investment plan for Anti Money Laundering reasons.

The investment I am making is medium to long term and not suitable for short term trading.
