GURUGRAM, India, Dec. 7, 2021

- As the UAE are almost entirely reliant on imports of medical devices, abundant opportunities are available for medical device companies to meet the country's growing demand.
- Increasing presence of Global Manufacturers into the UAE Medical Devices market will support the dominance of Distributor Mediated sales as these companies require local distributor partnerships to sell their devices in UAE.
- Innovative surgical interventions like autonomous surgical robots and intelligent balloon catheters will enhance outcomes of complex surgeries and enable new forms of minimally invasive surgeries.

GURUGRAM, India, Dec. 7, 2021 /PRNewswire/ - Increased Demand for Radiography Services - High incident rates of lung and heart diseases prompt hospitals to make enhancements for medical equipment, thus, increasing the demand for general radiography devices like electro-cardiographs, ultrasound, x-ray and others. The major advantages of digital imaging are cost-effectiveness and easy accessibility. The hospitals are able to cut the cost by lowering the film price, reducing the requirement of storage space, and decreasing the number of people required to run the services and archive sections.

Rise of Telemedicine Industry: The Telehealth market in UAE is forecast to reach over \$598.5 Mn by 2025, expanding 825% CAGR from 2020 to 2025. The highest growing segment within telehealth will be virtual visit market, which is expected to reach \$280.7 Mn by 2025 representing 830.7% CAGR. The market holds many opportunities to grow owing to the lack of access to care and rising provider adoption of telemedicine, rising consumer demand and patient acceptance, and enhanced quality of care.
