

TOP 10 REASONS TO INVEST IN WOODVILLE

1. SECURITY

The loan is only granted to law firms when there is "ATE insurance". ATE stands for "After The Event." It covers the costs which a claimant must pay to a defendant when a claim is unsuccessful.

2. RISING ASSET CLASS AMONG INSTITUTIONAL INVESTORS

There are a significant number of large investors, private banks, and other types of institutional investors who are allocating significant parts of their financial assets to litigation finance. The British litigation finance industry has almost doubled the size of its UK assets over the past three years, with as much as [£2.2 billion \(\\$2.7 billion\)](#).

3. DIVERSIFICATION

Woodville offer investors the possibility to diversify into a new kind of asset. Stocks, bonds, and mutual funds may represent up to 100% of the least diversified investors. Litigation finance offers a chance to investors to open themselves up to a new asset class.

4. MULTI-CURRENCY

Investors have the possibility to invest in the note in the currency of their choice - euros, US dollars or pounds sterling. Woodville cover the currency rate risk.

5. SHORT DURATION

While most investment opportunities require investors to freeze their assets for several years, the Woodville note allows investors to invest capital for a short time duration – one year - enabling them to generate income on their cash deposits.

6. PROTECTION AGAINST MARKET VOLATILITY

Woodville offer returns, which are uncorrelated to financial markets. This is particularly attractive in times of uncertainty for market fluctuations, or when a financial bubble in the financial markets is feared.

7. SUCCESSFUL TRACK RECORD

Over 31,500 legal claims have been funded with 0 default.

8. PROTECTION AGAINST INFLATION

With a fixed paid coupon of 10-12%, the return offered by Woodville partly hedges against inflation.

9. FREQUENCY OF COUPON

The coupon is paid quarterly. This is ideal for investors who expect to receive a regular stream of income from their assets. Moreover, it is possible to reinvest the coupon on a regular basis.

10. ATTRACTIVE YIELD

The annual coupon pays a yield of 10% for the one-year note. There is no withholding tax on the Woodville note. This yield acts as an attractive alternative in the global environment of low returns - cash deposits or government bonds do not deliver more than 1-2% a year.
