You may have to pay significant extra costs to cash in early. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest 10.000,00 GBP. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period/maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Buying this product holds that you think the underlying price will increase.

## What happens if Altarius ETI AG is unable to pay out?

In the case of default by the manufacturer the assets it holds as collateral may be realized in order to meet its obligations to the investor and the cash proceeds of this will be paid out in the order of priority of payments applicable to the products. These proceeds may not be sufficient to meet all obligations and make all payments due in respect of the securities. In these circumstances you may not be able to realize the full value of your securities and suffer a partial or total loss on your investment. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.
